Print at 100% / Actual size, SINGLE-sided. Crease along the grey line, fold so both printed faces are outward, glue, then cut. This bar must measure exactly 80 mm:

TWO-LOOK

■■□ 2/3 · A

OLL CROSS · yellow edges

Line bar left-to-right
FRUR'U'F'

Hook hook pointing front-right
fRUR'U'f'

OLL CORNERS · yellow face

Sune 1 yellow, rest clockwise
RUR'U RU2R'

Anti-Sune 2 yellow, rest counter-clockwise
RU2R' U'RU'R'

Pi 2 yellow, headlights left
fRUR'U'f' FRUR'U'F'

No yellow edge at all? Run the first one, then read again.

OLL CORNERS · continued

Headlights 3 2 yellow, headlights at the back
R2DR'U2 RD'R'U2R'

2x Headlights 2 0 yellow, headlights both sides
RUR'U RU'R' URU2R'

Chameleon 3 2 yellow next to each other
rUR'U' r' FRF'

Bowtie 3 2 yellow diagonal
F'rUR'U' r' FR

FALLBACK
The badge on each row is your fallback: that many Sunes, with a U turn between, also finishes the case. Machine-checked; three is the worst.
Top not all yellow and nothing matches? Run Sune and read again.

■ RUR'U' sexy move ■ RUR'U Sune ■ R'FRF' sledgehammer gap = change grip

FIRST SOLVE

■□□ 1/3 · A

New here? Do the walkthrough once at cubepath-six.vercel.app/learn. This card is the memory jog.

NOTATION
R U F L D B = turn that face clockwise, looking at it from outside the cube.
' = counter-clockwise. 2 = half turn. Lowercase r f = that face plus the layer behind it, turning together.
y = spin the whole cube left, white staying down. A whole-cube turn solves nothing.

WORDS
algorithm = a fixed sequence of turns · trigger = a short algorithm your hands run as one unit

1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's side color must match the center it touches. No algorithm — work it out.
Can't see it? Build the four white edges on the YELLOW face first, each above its matching center, then turn each one down 180 degrees.

2 WHITE CORNERS
Find a white corner on top, turn U until it sits above the empty slot it belongs in, then match a picture below and repeat until it drops in.

white sticker RIGHT
RUR'U'

white sticker FRONT
L'U'LU

white sticker UP run the first one once to knock it out, then look again
RUR'U'

3 MIDDLE EDGES
Top edge with NO yellow: turn U until its front color matches the center under it. The arrow shows which slot it goes to.

goes RIGHT
U RUR'U' y L'U'LU

goes LEFT
U' L'U'LU y' RUR'U'

Edge stuck in the wrong slot? Run either one to kick it out, then place it.

■ RUR'U' sexy move ■ RUR'U Sune ■ R'FRF' sledgehammer gap = change grip

ANNEX — BIG CUBES AND THE MAP

□□□ A · A

BIG CUBES · 4x4 and 5x5
Reduce: build the 6 centers → pair the 12 edges → solve it as a 3x3. Rw = 2 layers wide. 3Rw = 3 layers. 2R = 2nd LAYER ONLY — never widen it.

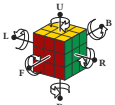

last 2 edges	R U R' F R' F' R — slice out, run it, slice back — both cubes
4x4 PLL parity	2R2 U2 2R2 Uw2 2R2 Uw2 — 2 edge pairs swapped · half the time

4x4 OLL parity – 1 edge pair flipped · half the time
Rw U2 x Rw U2 Rw U2 Rw' U2 Lw U2 Rw' U2 Rw U2 Rw' U2 Rw'

5x5 edge parity – 1 edge pair flipped · half the time · one move differs; 5x5 has no PLL parity
Rw U2 x Rw U2 Rw U2 3Rw' U2 Lw U2 Rw' U2 Rw U2 Rw' U2 Rw'

Fix parity during the last layer, **before** OLL and PLL — both parity algorithms move corners.

NOTATION

Each letter turns that face clockwise, seen from outside the cube — so from your seat L, D and B look counter-clockwise. ' = counter-clockwise. 2 = half turn.
M = middle slice, turning the way L turns. x y z = the whole cube, turning the way R, U and F turn. Lowercase r f = that face plus the layer behind it, turning together.

BEGINNER SHORTCUT · use it until you know Sune
Twist a yellow corner four turns at a time, turning ONLY the top face between corners.

yellow faces RIGHT	R'D'RD x2
yellow faces FRONT	D'R'DR x2

WORDS
algorithm = a fixed sequence of turns · trigger = a short algorithm your hands run as one unit · sexy move = the R U R' U' trigger · sledgehammer = the R' F R F' trigger · parity = a case a 3x3 cannot have · edge pair = two edges glued into one, on a 4x4 or 5x5

■ RUR'U' sexy move ■ RUR'U Sune ■ R'FRF' sledgehammer gap = change grip

THE LADDER

1/3 FIRST SOLVE · 9 algorithms · unlock: five solves, card face down.
2/3 TWO-LOOK · +13 · unlock: fifteen last layers in exactly two algorithms.
3/3 ONE-LOOK PLL · +15 · done: all 21 named, twice on separate days.

After that: full OLL, 57 cases planning, look-ahead — in the app, not on card stock.

WHY THERE ARE ONLY THREE
A card is good at a closed set of cases you tell apart by sight. It is bad at a skill with 57 cases. 57 of which differ only in a sliver a fifth of a millimetre wide at this size. All of them are in the app, with a trainer that drills the medium stops.

PRINT AND VERSION
Every ALGORITHM on these cards is expanded from machine-verified data and checked against a cube simulator at build time; if one were wrong the build would fail rather than ship. Recognition wording is generated from the same permutation the diagram is drawn from.
Set v1.0 · reprint any single card at cubepath-six.vercel.app/print · print at 100% / Actual size, never 'Fit to page'.
Not a tee, no undock, no order. Use it when you buy a 4x4.

■■■ 3/3 · B

ONE-LOOK PLL

EDGES ONLY · corners already home
● **U** B solid; F L R headlights; 3 edges counter-clockwise
M2U M2U M'UM2

● **Ua** B solid; F L R headlights; 3 edges clockwise
M2U R2U' R'U' RUR'

● **H** all 8 headlights; opposite edges swap
M2U'M2 U2 M2UM2

● **Z** all 8 headlights; adjacent edges swap
M'U' M2U'M2U' M'U2 M2U

HOW TO LOOK
1. Count the headlight faces. One = front of that card. Four = this column. None = the column on the right.
2. Only then read the edges to pick the exact case.
3. Line the case up as drawn, run it, turn the top to finish — that last face turn is the AUF.
● = already yours from Card 2.

WORDS
PLL = slide the top pieces home. headlights = two matching corners on one face. · AUF = the top turn that lines a case up · adjacent corner swap = the swapping corners share an edge · diagonal corner swap = the swapping corners sit opposite

DIAGONAL CORNER SWAP · no headlights anywhere

■ **Nb** pairs B-right F-left L-back R-front
R' URU'R' F'U'F RUR' FR'F'
RU'R

■ nothing matches
x' L'U'LD' L'U'LD L'U'LD'
L'U'LD

STUCK?
Case you have not learned? Two-look it from Card 2 — T-Perm then Bolton Tee times by one case? Park it, two-look it, come back next week.
UB still solves it. Nothing here can strand you.

Next: the other 57 top-face cases, and the first two layers solved as pairs — drilled with a cube in the app. cubepath-six.vercel.app/practice

DONE — all twenty-one named correctly, twenty-one in a row, no card in hand, on two separate days. □ MASTER: PLL under 3 s, solves under 0:30. My target: _____ · 20 mm

LAST-LAYER ORDER ON THIS CARD: yellow cross, match edges, place corners, twist corners. Card 2 replaces this order permanently — it is the only thing on this card that gets retired.

two matched, opposite run it once from any hold, then look again
RUR'U RU2R'

two matched, side by side hold them BACK and LEFT
RUR'U RU2R'

yellow faces FRONT x2
D'R'DR

yellow faces RIGHT x2
R'D'RD

one corner home hold it FRONT-LEFT
RU'L'U R'U'L

no corner home run it once from any hold, then look again
RU'L'U R'U'L

Line hold the bar left-to-right
FRUR'U'F'

Hook two at a right angle; hold them BACK and LEFT
FRUR'U'F'

Dot no yellow edge at all
FRUR'U'F'

4 YELLOW CROSS · yellow edges only — ignore the corners

6 PUT THE YELLOW CORNERS HOME

This cycles the other three corners into place. It also twists the yellow face you just built — expected. the next step rebuilds it.

7 TWIST THE YELLOW CORNERS

One algorithm, up to three times: dot, to hook, to line, to cross.

5 MATCH THE YELLOW EDGES

First turn U so at least TWO to edges match the center under them. This algorithm is called Sune; you use it on every card after this one.

Between corners turn ONLY the top face. To bring the next unsolved corner to front-right. Never turn the whole cube. The cube will look destroyed while you do this. Keep going — the last two turns things it back.

FIRST SOLVE · yellow edges only — ignore the corners

■□□ 1/3 · B

THE NEW ORDER: yellow cross, yellow face, corners home, edges home. This never changes again. Card 1's order is retired, and so is Mdas: it moves corners first, then the yellow face, and here the yellow face is finished first.

UNJACK CARD 3 — fifteen last layers in a row, each finished in exactly two algorithms, case named out loud first. A repeat does not count. □ MASTER: solves averaging under 1:00. My target: _____ · NEXT: 3/3 ONE-LOOK PLL

30 mm

TWO-LOOK · headlights = two matching corners on one face

PLL CORNERS

RUR'U' R'F R2U'R'U' RUR'F'

STUCK?
Corners home but nothing solves? Turn the top face once and read again — that is often the whole fix.
Corners F-R-trn. No headlights to hold it? Run it twice.
Edges: Dot. No solved edge to put at the back? Run it twice.
Each case on the front replaces one repeat with one run. Three a H VS Z.
Both show headlights on all four faces. The edge between them decides: it belongs to the opposite face = H, run it as neighbour = Z.

START HERE · two new algorithms finish any last layer

FRUR'U' RUR'F' RUR'U' R'FRF'

Y no headlights — the two swapping corners sit diagonally

PLL EDGES · corners home, top still not solved

R2U RUR'U' R'U' RUR'

Ub the front edge travels LEFT

Ua the front edge travels RIGHT

M2U M2U M'UM2

H both pairs swap straight across

M2U'M2 U2 M2UM2

Z each pair swaps with its neighbour

M'U' M2U'M2U' M'U2 M2U

THE NEW ORDER: yellow cross, yellow face, corners home, edges home. This never changes again. Card 1's order is retired, and so is Mdas: it moves corners first, then the yellow face, and here the yellow face is finished first.

UNJACK CARD 3 — fifteen last layers in a row, each finished in exactly two algorithms, case named out loud first. A repeat does not count. □ MASTER: solves averaging under 1:00. My target: _____ · NEXT: 3/3 ONE-LOOK PLL.
