Print at 100% / Actual size — do NOT fit to page. Two-sided, flip on the LONG edge. The numeral on both faces is your check: cut ONE card first. This bar must measure exactly 80 mm:

New here? Do the walkthrough once at cubepath-six.vercel.app/learn. This card is the memory jog.

NOTATION
R U F L D B = turn that face clockwise, looking at it from outside the cube.
' = counter-clockwise. 2 = half turn. Lowercase r f = that face plus the layer behind it, turning together.
y = spin the whole cube left, white staying down. A whole-cube turn solves nothing.

WORDS
algorithm = a fixed sequence of turns · trigger = a short algorithm your hands run as one unit

1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's side color must match the center it touches. No algorithm — work it out.
Can't see it? Build the four white edges on the YELLOW face first, each above its matching center, then turn each one down 180 degrees.

2 WHITE CORNERS
Find a white corner on top, turn U until it sits above the empty slot it belongs in, then match a picture below and repeat until it drops in.

white sticker RIGHT RUR'U'

white sticker FRONT L'U'LU

white sticker UP run the first one once to knock it out, then look again
RUR'U'

3 MIDDLE EDGES
Top edge with NO yellow: turn U until its front color matches the center under it. The arrow shows which slot it goes to.

goes RIGHT
U RUR'U' y L'U'LU

goes LEFT
U' L'U'LU y' RUR'U'

Edge stuck in the wrong slot? Run either one to kick it out, then place it.

RUR'U' sexy move · RUR'U Sune · R'FRF' sledgehammer · gap = change grip

Print at 100% / Actual size — do NOT fit to page. Two-sided, flip on the LONG edge. The numeral on both faces is your check: cut ONE card first. This bar must measure exactly 80 mm:

4 YELLOW CROSS · yellow edges only — ignore the corners

Dot no yellow edge at all
FRUR'U'F'

Hook two at a right angle: hold them BACK and LEFT
FRUR'U'F'

Line hold the bar left-to-right
FRUR'U'F'

One algorithm, up to three times: dot to hook to line to cross.

5 MATCH THE YELLOW EDGES

First turn U so at least two top edges match the center under them. This algorithm is called Sune; you use it on every card after this one.

two matched, side by side hold them BACK and LEFT
RUR'U RU2R'

two matched, opposite run it once from any hold, then look again
RUR'U RU2R'

6 PUT THE YELLOW CORNERS HOME

one corner home hold it FRONT-LEFT
RU'L'U R'U'L

no corner home run it once from any hold, then look again
RU'L'U R'U'L

This cycles the other three corners into place. It also twists the yellow face you just built — expected, the next step rebuilds it.

7 TWIST THE YELLOW CORNERS

yellow faces RIGHT
R'D'RD x2

yellow faces FRONT
D'R'DR x2

Between corners turn ONLY the top face, to bring the next unsolved corner to front-right. Never turn the whole cube. The cube will look destroyed while you do this. Keep going — the last top turn brings it back.

LAST-LAYER ORDER ON THIS CARD: yellow cross, match edges, place corners, twist corners. Card 2 replaces this order permanently — it is the only thing on this card that gets retired.
UNLOCK CARD 2 — five scrambles in a row with this card face down. □ MASTER: those five under 3:00. My target: ______ · NEXT: 2/3 TWO-LOOK

Z each pair swaps with its neighbour
M'U' M2U'M2U' M'U2 M2U

START HERE · two new algorithms finish any last layer

Yellow cross: F R U R' U' F' until the cross appears — at most 3.
Yellow face: Sune, read again, repeat — at most 3 (see the badges).
Corners: T-Perm. No headlights to hold left? Run it twice.
Edges: Ub. No solved edge to put at the back? Run it twice.
Each case on the front replaces one repeat with one run. Three a week; you can solve the whole time.

H VS Z

Both show headlights on all four faces. The edge between them decides: it belongs to the opposite face = H, to a neighbour = Z.

STUCK?

Corners home but nothing solves? Turn the top face once and read again — that is often the whole fix.
One case has beaten you five times? Park it, use its fallback above, come back next week.
A single piece looks twisted and no algorithm touches it? The cube was reassembled wrong. Pop it out and reseat it.

WORDS

OLL = make the whole top face yellow · PLL = slide the top pieces home · headlights = two matching corners on one face · AUF = the free top turn that lines a case up

THE NEW ORDER: yellow cross, yellow face, corners home, edges home. This never changes again. Card 1's order is retired, and so is Niklas: it moves corners but wrecks the yellow face, and here the yellow face is finished first.

THE LADDER

1/3 FIRST SOLVE · 9 algorithms · unlock: five solves, card face down.
2/3 TWO-LOOK · +13 · unlock: fifteen last layers in exactly two algorithms.
3/3 ONE-LOOK PLL · +15 · done: all 21 named, twice on separate days.
After that: full OLL, F2L, cross planning, look-ahead — in the app, not on card stock.

WHY THERE ARE ONLY THREE

A card is good at a closed set of cases you tell apart by sight. It is bad at a skill you drill. F2L, cross planning and look-ahead are drills with no finite case list. Full OLL is 57 cases, 22 of which differ only in a sliver a fifth of a millimetre wide at this size. All of them are in the app, with a real cube and randomised setup. This set stops where the medium stops.

WORDS

OLL = make the whole top face yellow · PLL = slide the top pieces home · Sune = the one-yellow-corner algorithm, used on every card after Card 1 · sexy move = the R U R' U' trigger · sledgehammer = the R' F R F' trigger · headlights = two matching corners on one face · trigger = a short algorithm your hands run as one unit · AUF = the free top turn that lines a case up
parity = a case a 3x3 cannot have · edge pair = two edges glued into one, on a 4x4 or 5x5 · F2L = first two layers, solved as pairs · look-ahead = watching the next piece while your hands finish this one · adjacent corner swap = the swapping corners share an edge · diagonal corner swap = the swapping corners sit opposite

PRINT AND VERSION

Every ALGORITHM on these cards is expanded from machine-verified data and checked against a cube simulator at build time; if one were wrong the build would fail rather than ship. Recognition wording is generated from the same permutation the diagram is drawn from.
Set v1.0 · reprint any single card at cubepath-six.vercel.app/print · print at 100% / Actual size, never 'Fit to page'.

Not a tier, no unlock, no order. Use it when you buy a 4x4.

This set stops where the medium stops.
WORDS
OLL = make the whole top face yellow · PLL = slide the top pieces home · Sune = the one-yellow-corner algorithm, used on every card after Card 1 · sexy move = the R U R' U' trigger · sledgehammer = the R' F R F' trigger · headlights = two matching corners on one face · trigger = a short algorithm your hands run as one unit · AUF = the free top turn that lines a case up
parity = a case a 3x3 cannot have · edge pair = two edges glued into one, on a 4x4 or 5x5 · F2L = first two layers, solved as pairs · look-ahead = watching the next piece while your hands finish this one · adjacent corner swap = the swapping corners share an edge · diagonal corner swap = the swapping corners sit opposite
PRINT AND VERSION
Every ALGORITHM on these cards is expanded from machine-verified data and checked against a cube simulator at build time; if one were wrong the build would fail rather than ship. Recognition wording is generated from the same permutation the diagram is drawn from.
Set v1.0 · reprint any single card at cubepath-six.vercel.app/print · print at 100% / Actual size, never 'Fit to page'.
Not a tier, no unlock, no order. Use it when you buy a 4x4.
20 mm

Print at 100% / Actual size — do NOT fit to page. Two-sided, flip on the LONG edge. The numeral on both faces is your check: cut ONE card first. This bar must measure exactly 80 mm:
