NOTATION
 R U F L B B = turn that face clockwise, looking at from outside the cube
 r = counter-clockwise, 2 = half turn. Lowercase r f = that face plus the layer behind it, turning together.
 y = spin the whole cube left, white staying down. A whole-cube turn solves nothing.

WORDS

algorithm = a fixed sequence of turns - trigger = a short algorithm you hand-run as one unit

1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's side color must match the center it touches. No YELLOW – work it out. Can't see it? Build the four white edges on the YELLOW face first, each above its matching center; then turn each one down 180 degrees.

2 WHITE CORNERS

Find a white corner on top, turn U until it sits above the empty slot it belongs in, then match a picture below and repeat until it drops in.

white sticker RIGHT
R'U'R'

white sticker FRONT
L'U'L

white sticker UP run the first one once to knock it out, then look again
R'U'R'

3 MIDDLE EDGES

Top edge with NO yellow: turn U until its front color matches the center under it. If the arrow shows which slot it goes to.

goes RIGHT
y R'U'R' y L'U'L

goes LEFT
y L'U'L y' R'U'R'

Edge stuck in the wrong slot? Run either one to kick it out, then place it!
