

Print at 100% / Actual size — do NOT fit to page. Two-sided, flip on the SHORT edge. The numeral on both faces is your check: cut ONE card first. This bar must measure exactly 80 mm: 

FIRST SOLVE

New here? Do the walkthrough once at cubepath-six.vercel.app/ learn. This card is the memory jog.

NOTATION

R U F L D B = turn that face clockwise, looking at it from outside the cube.
r = counter-clockwise, 2 = half turn. Lowercase r f = that face plus the layer behind it, turning together.
y = spin the whole cube left, white staying down. A whole-cube turn solves nothing.

WORDS

algorithm = a fixed sequence of turns - trigger = a short algorithm your hands run as one unit
1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's side color must match the center it touches. No algorithm — work it out. Can't see it? Build the four white edges on the YELLOW face first, each above its matching center, then turn each one down 180 degrees.

2 WHITE CORNERS

Find a white corner on top, turn U until it sits above the empty slot it belongs in, then match a picture below and repeat until it drops in.

3 MIDDLE EDGES
Top edge with NO yellow: turn U until its front color matches the center under it. The arrow shows which slot it goes to.

Edge stuck in the wrong slot? Run either one to kick it out, then place it.

FAILBACK
The badge on each row is your fallback: that many Sunes, with a U turn between, also finishes the case. Machine-checked; three is the worst.
Top not all yellow and nothing matches? Run Sune and read again.

ANNEX — BIG CUBES AND THE MAP

BIG CUBES - 4x4 and 5x5

Reduce: build the 6 centers → pair the 12 edges → solve it as a 3x3. Rw = 2 layers wide. 3Rw = 3 layers. 2R = 2nd LAYER ONLY — never widen it.
