Yellow cross: F R U R' U' F' until the cross appears — at most 3.
Yellow face: Sune, read again, repeat — at most 3 (see the badges).
Corners: T-Perm. No headlights to hold left? Run it twice.
Each case on the front replaces one repeat with one run. Three a week, you can solve the whole time.
Edges: Db. No solved edge to put at the back? Run it twice.

H VS Z
Both show headlights on all four faces. The edge between them decides: it belongs to the opposite face = H, to a neighbour = Z.

STUCK?
Corners home but nothing solves? Turn the top face once and read again — that is often the whole fix.
One case has beaten you three times? Park it, use its fallback above.
A single piece looks twisted and no algorithm touches it? The cube was reassembled wrong. Pop it out and reset it.

WORDS
OLL = make the whole top face yellow · PLL = slide the top pieces home · headlights = two matching corners on one face · ALF = the free top turn that lines a case up

THE NEW ORDER: yellow cross, yellow face, corners home, edges home. This never changes again. Card 1's order is refined, and so is Nidas: it moves corners but wrecks the yellow face, and here the yellow face is finished first.
UNLOCK CARD 3 — fifteen last layers in a row, each finished in exactly two algorithms, case named out loud first. A repeat does not count. □ MASTER.

FALLBACK
The badge on each row is your fallback: that many Sunes, with a U turn between, also finishes the case. Machine-checked; three is the worst.
Top not all yellow and nothing matches? Run Sune and read again.
