HOW TO LOOK

1. Count the headlight faces. One = front of this card. Four = this column. None = the column on the right.
2. Only then read the edges to pick the exact case.
3. Line the case up as drawn, run it, turn the top again to finish — that last turn is the AUF.

● = already yours from Card 2.

WORDS

PLL = slide the top pieces home. headlights = two matching adjacent corner swap = the swapping corners share an edge · diagonal corner swap = the swapping corners sit opposite

Card 2 gives you 19!/2 last layers in one look. This card gives 71/72. Next: the other 57 top-face cases, and the final two layers solved as pairs — dotted with a cube in the app: cubepath-six.vercel.app/practice

DONE: ____ all twenty-one named correctly, twenty-one in a row, no card in hand, on two separate days. ☐ MASTER: PLL under 3 s, solves under 0:30. My target: _____

30 mm
