Yellow cross: F R U R' U' F' until the cross appears — at most 3. Yellow face: Sune, read again, repeat — at most 5 (see the badges). Corners: T-Perm. No headlights to hold left? Run it twice. Each case on the front replaces one repeat with one run. Three a week: you can solve the whole time.

PLL EDGES · corners home, top still not solved

Corners home but nothing solves? Turn the top face once and read again — that is often the whole fix.
One case has beaten you five times? Park it. use is fallback above.
come back next week.

STUCK?
Both show headlights on all four faces. The edge between them decides: it belongs to the opposite face = H, to a neighbour = Z.

H vs Z
Both show headlights on all four faces. The edge between them decides: it belongs to the opposite face = H, to a neighbour = Z.

FALLBACK
The badge on each row is your fallback: that many Sunes, with a U turn between, also finishes the case. Machine-checked; three is the worst.
Top not all yellow and nothing matches? Run Sune and read again.

THE NEW ORDER: yellow cross, yellow face, corners home, edges home. This never changes again. Card 1's order is refined, and so is Nidas: it moves corners but weeks the yellow face, and here the yellow face is finished first.
UNLOCK CARD 3 — fifteen last layers in a row, each finished in exactly two algorithms, case named out loud first. A repeat does not count. □ MASTER.
