

Print at 100% / Actual size, SINGLE-sided. Crease along the grey line, fold so both printed faces are outward, glue, then cut. This bar must measure exactly 80 mm.

[illegible]

FIRST SOLVE

Now here? Do the walkthrough once at cubepath3.svercel.app/turn. This card is the memory jog.

NOTATION
R U F L B B = turn that face clockwise, looking at from outside the cube
r = counter-clockwise, **2** = half turn. Lowercase **r f** = that face plus the layer behind it, turning together.
y = spin the whole cube left, white staying down. A whole-cube turn solves nothing.

WORDS
 algorithm = a fixed sequence of turns - trigger = a short algorithm you hand out to use - unit

1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's side color must match the center it touches. No YELLOW - work it out. Can't see it? Build the four white edges on the YELLOW face first, each above its matching center, then turn each one down 180 degrees.

2 WHITE CORNERS

Find a white corner on top, turn U until it sits above the empty slot it belongs in, then match a picture below and repeat until it drops in.

white sticker RIGHT
R'U'R

white sticker FRONT
L'U'L

white sticker UP run the first one once to knock it out, then look again
R'U'R

3 MIDDLE EDGES

Top edge with NO yellow: turn U until its front color matches the center under it. The arrow shows which slot it goes to.

goes RIGHT
U R'U' y L'U'L

goes LEFT
U L'U'L U' y' R'U'R

Edge stuck in the wrong slot? Run either one to kick it out, then place it.

Diagram illustrating the sequence of moves for solving the Yellow Corners of a 3x3 Rubik's Cube. The sequence consists of six steps, each with a numbered instruction, a diagram of the cube state, and a corresponding RUF (Right Up Front) move.

- 6 PUT THE YELLOW CORNERS HOME**: The cube shows yellow corners in the bottom layer. The RUF move is **RUF**.
- 5 MATCH THE YELLOW BACKS**: The cube shows yellow corners in the back layer. The RUF move is **RUF**.
- 4 YELLOW EDGES ONLY - ignore the corners**: The cube shows yellow edges in the bottom layer. The RUF move is **RUF**.
- 3 MATCH THE YELLOW FRONTS**: The cube shows yellow corners in the front layer. The RUF move is **RUF**.
- 2 TWIST THE YELLOW CORNERS**: The cube shows yellow corners in the front layer. The RUF move is **RUF**.
- 1 YELLOW FRONTS RIGHT ON**: The cube shows yellow corners in the front layer. The RUF move is **RUF**.

The RUF move is defined as: Right Up Front.

Now here! Do the walk-through once at cubepath3.5.vercel.app/
 This card is the memory jog.

NOTATION
 R U L D B = turn that face clockwise, looking at from outside
 the cube
 r = counter-clockwise, 2 = half turn. Lowercase r = that face plus
 the layer behind it, turning together.
 y = spin the whole cube left, while staying down. A whole-cube
 turn solves nothing.

WORDS
 algorithm = a fixed sequence of turns = trigger = a short algorithm
 you hang on to as one unit

1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's
 side color must match the center it touches. No algorithm – work it
 out. You can't see it? Build the four white edges on the YELLOW face first,
 each above its matching center, then turn each one down 180
 degrees.

2 WHITE CORNERS

Find a white corner on top, turn U until it sits above the empty slot
 it belongs in, then match a picture below and repeat until it drops
 in.

white sticker RIGHT
RUR'U'

white sticker FRONT
L'L'U

white sticker UP run the first one once to knock it out,
 then look again
RUR'U'

3 MIDDLE EDGES

Top edge with NO yellow: turn U until its front color matches the
 center under it. The arrow shows which slot it goes to.

goes RIGHT
U R'UR' y L'L'U

goes LEFT
U' L'L'U'U' y' R'UR'

Edge stuck in the wrong slot? Run either one to kick it out, then
 place it in the right slot.

NOTATION
 R U F L D B = turn that face clockwise, looking at it from outside
 r = counter-clockwise, 2 = half turn. Lowercase r f = that face plus the cube
 y = spin the whole cube left, white staying down. A whole-cube turn solves nothing.

WORDS
 algorithm = a fixed sequence of turns - trigger = a short algorithm you hands-run as one unit

1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's side color must match the center it touches. No algorithm – work it by hand.

Can't see it? Build the four white edges on the YELLOW face first, each about its matching center, then turn each one down 180 degrees.

2 WHITE CORNERS

Find a white corner on top, turn U until it sits above the empty slot it belongs in, then match a picture below and repeat until it drops in.

white sticker RIGHT
R'U'R'

white sticker FRONT
L'U'L

white sticker UP run the first one once to knock it out, then look again
R'U'R'

3 MIDDLE EDGES

Top edge with NO yellow: turn U until it sits front color matches the center under it. The arrow shows which slot it goes to.

goes RIGHT
U' R'U'R' y L'U'L

goes LEFT
U' L'U'L y' R'U'R'

Edge stuck in the wrong slot? Run either one to kick it out, then place it.

The diagram illustrates the 6 steps of the Yellow Corners algorithm for solving a Rubik's cube. Each step includes a text instruction, a diagram of the cube, and a corresponding code snippet.

- 1 YELLOW CROSS** ignore the corners

Do not worry either at all

`YELLOW_CROSS`
- 2 MATCH THE YELLOW EDGES**

First turn it so that two yellow edges match the center (turn U or U').

Then algorithm is called: `insert`, you use it on every card after this.

`YELLOW_EDGES`
- 3 MATCH THE YELLOW CORNERS**

One algorithm up to three turns need to be made to fix corners.

This cycles the other three corners into place. It also repeats the cycle.

`YELLOW_CORNERS`
- 4 PUT THE YELLOW CORNERS HOME**

no correct home turn it once from any hold then look

`YELLOW_CORNERS_HOME`
- 5 TURN THE YELLOW CORNERS**

hold the right angle: hold them BACK and LEFT

`TURN_YELLOW_CORNERS`
- 6 PUT THE YELLOW CORNERS HOME**

no correct home turn it once from any hold then look

`YELLOW_CORNERS_HOME`
