Newbie? Do the walk-through once at cubepath3.sixvercel.app/. This card is the memory jog.

NOTATION
R U L F B B' = turn a face clockwise, looking at from outside the cube.
r = counter-clockwise, **2** = half turn. Lowercase **r f** = that face plus the layer behind it, turning together.
y = spin the whole cube left, while staying down. A whole-cube turn solves nothing.

WORDS
 algorithm = a fixed sequence of turns - trigger = a short algorithm your hands run as one unit

1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's side color must match the center it touches. No algorithm - work it out.

Can't see it? Build the four white edges on the YELLOW face first, each above its matching center, then turn each one down 180 degrees.

2 WHITE CORNERS

Find a white corner on top, turn U until it sits above the empty slot it belongs in, then match a picture below and repeat until it drops in.

white sticker RIGHT
RUR'U'

white sticker FRONT
L'L'U

white sticker UP run the first one once to knock it out, then look again
RUR'U'

3 MIDDLE EDGES

Top edge with NO yellow: turn U until its front color matches the center under it. The arrow shows which slot it goes to.

goes RIGHT:
U RUR'U' y L'L'U

goes LEFT
U RUR'U' y' L'L'U y' RUR'U'

Edge stuck in the wrong slot? Run either one to kick it out, then undo.
