

FIRST SOLVE

New! Here's the walkthrough once at cubeputh-six-vercel/app/learn. This card is the memory jog!

NOTATION

R = clockwise, **2** = half turn. Lowercase **r** = that face plus the layer behind it, turning together.
y = spin the whole cube left, white staying down. A whole-cube turn solves nothing.

WORDS

algorithm = a fixed sequence of turns - trigger = a short algorithm your hands run as one unit

1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's side color must match the center it touches. No corners – turn it out.
 Can't see it? Build the four white edges on the YELLOW face, first, each above its matching center, then turn them one down 180 degrees.

2 WHITE CORNERS

white sticker RIGHT
RUR'U'

white sticker FRONT
L'ULU

white sticker UP Run the first one to knock it out, then look again
RUR'U'

3 MIDDLE EDGES

Top edge with NO yellow: turn U until its front color matches the center under it. The arrow shows what slot it goes to

U goes RIGHT
U' RUR'U' y L'ULU

U goes LEFT
U' L'ULU'U' y RUR'U'

Edge stuck in the wrong slot? Run either one to kick it out, then place it.
