ANNEX – BIG CUBES AND THE MAP GOO A A

BIG CUBES 4x4 and 5x5

Reduce, build the 6 centers → pair the 12 edges → solve it as a 3x3. $3Rw = 2$ layers wide. $3Rw = 3$ layers. $2R = 2nd$ Layer ONLY – never widen it.

last 2 edges $Rw' \quad U' \quad R' \quad U \quad R' \quad F \quad R' \quad F'$ slice out, run it, slice back – both cubes

4x4 PLL parity $2R2 \quad U2 \quad 2R2 \quad Uw2 \quad 2R2 \quad Uw2$ 2 edge pairs swapped – half the time

4x4 OLL parity – 1 edge pair flipped – half the time

$Rw \quad U2 \quad x \quad Rw \quad U2 \quad Rw' \quad U2 \quad Rw' \quad U2 \quad L \quad Rw \quad U2 \quad Rw' \quad U2 \quad Rw'$

5x5 edge parity – 1 edge pair flipped – half the time – *one move differs, 5x3 has no PLL parity*

$Rw2 \quad U2 \quad x \quad Rw2 \quad U2 \quad Rw' \quad U2 \quad Rw' \quad U2 \quad L \quad Rw2 \quad U2 \quad Rw' \quad U2 \quad Rw'$

Fix parity during the last layer, before OLL and PLL – both parity algorithms move corners

NOTATION

Each letter turns a face clockwise, seen from outside the cube – so from your seat, I and B look counter-clockwise – counter-clockwise = a half turn.

M – middle slice, turning the way L turns. $x \cdot y \cdot z =$ the whole cube, turning the way R/U/V. Lowercase f = that face plus the layer behind it, turning together.

WORDS

algorithm → a fixed sequence of turns · trigger → set your algorithm's hands run as one unit · edge · slice · move → the R U F U' trigger · slice/turn = the R U F R' trigger, parity = a case a 3x3 cannot have · edge pair → 2 edges glued into one, on a 4x4 or 5x5

RURU → sexy move **RURU** → sexy **R'RF'** → slice/turn gap = change grip

NNXX – BIG CUBES AND THE MAP AAA

BIG CUBES - 4x4 and 5x5

Reduce: build the 6 centers –> pair the 12 edges –> solve it as a 3x3. 2Rw 2Lw wide. 3Rw = 3 layers. 2Rd 2Nd lateral –> never widen it.

last 2 edges

4x4 PLL parity

4x4 OLL parity – 1 edge pair flipped – half the time

Rw U2 x Rw U2 R'w U2 Rw U2 Lw U2 Lw U2 R'w U2 Rw U2 R'w U2 Rw U2 R'w U2

3x5 edges parity – 1 edge pair flipped – half the time – one move differs, 5x5 has no PLL parity

Rw U2 x Rw U2 R'w U2 Rw U2 Lw U2 Lw U2 R'w U2 Rw U2 R'w U2 Rw U2 R'w U2

PLL parity during the last layer, before OLL and PLL, both parity algorithms move corners.

NOTATION

Each letter turns that face clockwise, seen from outside the cube – so from your seat, D and B look like – from clockwise = counter-clockwise, z = half turn.

M = middle slice, turning the way L turns. x y z = the whole cube, turning the way R U D, Lowercase f f = that face plus the layer behind it, turning together.

WORDS

edgeband = a fixed sequence of turns - trigger = a short algorithm your hands run as one unit - slice move = the R U R' U' trigger - schlemmer = the R' F R' trigger, parity = a case a 3x3 cannot have - edge pair = two edges glued into one, on a 4x4 or 5x5

ALRU sexy move, **RRU** SU, **RR'F** schlemmer, **rm** = change rim
