ANNEX – BIG CUBES AND THE MAP

BIG CUBES - 4x4 and 5x5

Reduce: place the 8 centers → pair the 12 edges → solve it as a 3x3. Rw = 2 layers wide. 3Rw = 3 layers wide. 2R = 2nd LAYER ONLY – never widen it.

last 2 edges

4x4 PLL parity

4x4 OLL parity - 1 edge pair flipped - half the time

Rw U2 x Rw U2 Rw U2 1 edge pair flipped - half the time **one move** differs, 3x3 has no PLL parity

Rw U2 x Rw U2 Rw U2 3Rw U2 1 edge pair flipped - half the time **one move** differs, 3x3 has no PLL parity

Rw U2 x Rw U2 Rw U2 3Rw U2 1 edge pair flipped - half the time **one move** differs, 3x3 has no PLL parity

Fix parity during the last layer, before OLL and PLL - both parity algorithm move centers.

NOTATION

Each letter turns that face clockwise, seen from outside the cube → so from your seat L, D and B look counter-clockwise. = counter-clockwise. 2 = half slice, slice, turning the way L turns. x = x = the whole cube, turning the way R, U and F turn. Lowercase f = that face plus the layer behind it, turning together.

□□□□□□□□

slide out, run it, slice back – both cubes

2 edge pairs swapped - half the time

BEGINNER SHORTCUT use it until you know 5S

Twist a yellow corner four turns at a time, turning ONLY the top face between corners.

yellow faces RIGHT **D'D'R'D** **x2**

yellow faces FRONT **D'D'R'D** **x2**

WORDS

algorithm = a fixed sequence of turns - trigger = a short algorithm your hands run as one unit - sexy move = the R U R' U' trigger - slicehammer = the R' F R B' trigger - parity = a case 3x3 cannot have - edge pair = 2 edges glued into one, on a 4x4 or 5x5
