Print at 100% / Actual size, SINGLE-sided. Crease along the grey line, fold so both printed faces are outward, glue, then cut. This bar must measure exactly 80 mm:

FIRST SOLVE ■□□ 1/3 · B

4 YELLOW CROSS · yellow edges only — ignore the corners

Dot no yellow edge at all
F R U R' U' F

Hook two to a right angle: hold them BACK and LEFT
F R U R' U' F'

Line hold the bar left-to-right
F R U R' U' F

One algorithm, up to three times: dot to hook to line to cross.

5 MATCH THE YELLOW EDGES

First turn U so at least two top edges match the center under them. This algorithm is called Sune; you use it on every card after this one.

two matched, side by side hold them BACK and LEFT
R U R' U R U2 R'

two matched, opposite run it once from any hold, then look again
R U R' U R U2 R'

Between corners turn ONLY the top face. To bring the next unsolved corner to front-right. Never turn the whole cube. The cube will look destroyed while you do this. Keep going — the last 6 do turn things it back.

6 PUT THE YELLOW CORNERS HOME

one corner home hold it FRONT-RIGHT
R U' L' U R U' L

no corner home run it once from any hold, then look again
R U' L' U R U' L

This cycles the other three corners into place. It also twists the yellow face you just built — expected, the next step rebuilds it.

7 TWIST THE YELLOW CORNERS

yellow faces RIGHT x2
R' D' R D R' D' R D

yellow faces FRONT x2
D' R' D R D' R' D R

Between corners turn ONLY the top face, to bring the next unsolved corner to front-right. Never turn the whole cube. The cube will look destroyed while you do this. Keep going — the last 6 turn things it back.

LAST-LAYER ORDER ON THIS CARD: yellow cross, match edges, place corners, twist corners. Card 2 replaces this order permanently — it is the only thing on this card that gets rotated.

UNLOCK CARD 2 — five scrambles in a row with this card face down. □ MASTER: those five under 3:00. My target: _____ · NEXT: 2/3 TWO-LOOK

30 mm

FIRST SOLVE ■□□ 1/3 · A

New here? Do the walkthrough once at cubepath-six.vercel.app/learn. This card is the memory jog.

NOTATION

R U F L D B = turn that face clockwise, looking at it from outside the cube.
' = counter-clockwise. 2 = half turn. Lowercase r f = that face plus the layer behind it, turning together.
y = spin the whole cube left, white staying down. A whole-cube turn solves nothing.

WORDS

algorithm = a fixed sequence of turns · trigger = a short algorithm your hands run as one unit

1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's side color must match the center it touches. No algorithm — work it out.
Can't see it? Build the four white edges on the YELLOW face first, each above its matching center, then turn each one down 180 degrees.

2 WHITE CORNERS

Find a white corner on top, turn U until it sits above the empty slot it belongs in, then match a picture below and repeat until it drops in.

white sticker RIGHT
R U' R' U

white sticker FRONT
L' U' L U

white sticker UP run the first one once to knock it out, then look again
R U R' U'

3 MIDDLE EDGES

Top edge with NO yellow: turn U until its front color matches the center under it. The arrow shows which slot it goes to.

goes RIGHT
U R U' R' U' F' U F

goes LEFT
U' L' U L U F U' F'

Edge stuck in the wrong slot? Run either one to kick it out, then place it.
