

### FIRST SOLVE

New here? Do the walkthrough once at [cubepath-six.vercel.app/](http://cubepath-six.vercel.app/)!  
This card is the memory jog.

### NOTATION

R U' F L D B = turn that face clockwise, looking at it from outside the cube

r = counter-clockwise, 2 = half turn. Lowercase r f = that face plus the layer behind it, turning together.

y = spin the whole cube left, white staying down. A whole-cube turn solves nothing.

### WORDS

algorithm = a fixed sequence of turns trigger = a short algorithm you handle as one unit

### 1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's side color must match the center it touches. No algorithm – work it out.

Can't see it? Build the four white edges on the YELLOW face – first, each edge is white facing center, then turn each one down 180 degrees.

### 2 WHITE CORNERS

Find a white corner on top, turn U until it sits above the empty slot it belongs in, then match a picture below and repeat until it drops in.

**white sticker RIGHT**  
**RUR'U'**

**white sticker FRONT**  
**L'L'LU**

**white sticker UP** run the first one once to knock it out, then look again  
**RUR'U'**

### 3 MIDDLE EDGES

Top edge with NO yellow: turn U until its front color matches the center under it. The arrow shows which slot it goes to.

**goes RIGHT**  
**U' RUR'U' y L'L'LU**

**goes LEFT**  
**U' L'L'LU y' RUR'U'**

Edge stuck in the wrong slot? Run either one to kick it out, then place it.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

**ANNEX – BIG CUBES AND THE MAP**

**BIG CUBES** - 4x4 and 5x5  
 Reduce, build the 2 centers → pair the 12 edges → solve it as a 3x3. Rw = 2 layers wide. 3Rw = 3 layers. 2R = 2nd LAYER ONLY – never widen it.

**last 2 edges**

|     |    |      |      |      |     |                                            |
|-----|----|------|------|------|-----|--------------------------------------------|
| Rw' | U' | R' U | R' F | R' F | Rw  |                                            |
| 2R2 | U2 | 2R2  | Uw2  | 2R2  | Uw2 | slice out, run it, slice back – both cubes |

2 edge pairs swapped - half the time

**4x4 OLL parity** - 1 edge pair flipped - half the time

|    |    |      |    |    |    |     |    |    |    |     |    |    |    |     |    |     |
|----|----|------|----|----|----|-----|----|----|----|-----|----|----|----|-----|----|-----|
| Rw | U2 | x Rw | U2 | Rw | U2 | Rw' | U2 | Lw | U2 | Rw' | U2 | Rw | U2 | Rw' | U2 | Rw' |
|----|----|------|----|----|----|-----|----|----|----|-----|----|----|----|-----|----|-----|

5x5 edge parity - 1 edge pair flipped - half the time - one move differs, 3x5 faces no PLL parity

|    |    |      |    |    |    |      |    |    |    |     |    |    |    |     |    |     |
|----|----|------|----|----|----|------|----|----|----|-----|----|----|----|-----|----|-----|
| Rw | U2 | x Rw | U2 | Rw | U2 | 3Rw' | U2 | Lw | U2 | Rw' | U2 | Rw | U2 | Rw' | U2 | Rw' |
|----|----|------|----|----|----|------|----|----|----|-----|----|----|----|-----|----|-----|

Fix parity during the last layer, before OLL and PLL - both parity algorithm move corners.

**NOTATION**

- R U F L D B = turn that face clockwise, from outside the cube : "counterclockwise, 2 - half turn."
- M = middle slice, turning the way L turns x y z = the whole cube, turning the way R, U, L turn. Lowercase r f = that face plus the side behind it, turning together.

**WORDS**
