

Print at 100% / Actual size, SINGLE-sided. Crease along the grey line, fold so both printed faces are outward, glue, then cut. This bar must measure exactly 80 mm.

[illegible]

ANNEX – BIG CUBES AND THE MAP

BIG-BIGS

#4x4 and #5x5
Reduce; slide the 6 centers → pair the 12' edges → solve it as a 3x3. Rw = 2 layers wide. 3Rw = 3 layers wide. 2R = 2nd LAYER ONLY – never widen it.

Last 2 edges

Rw'	U'	R'	U'	R'	F'	R'	F'		
2R2 U	2 R2	Uw2	2R2	Uw2				edge out, run it, slice back – both cubes	
								slide pair swapped - half the time	

4x4 PLL parity

4x4 OLL parity = 1 edge pair flipped - half the time

Rw	U2 x	Rw	U2	Rw	U2	Rw'	U2	Rw'	U2	Rw'	U2	Rw'
slice parity = 1 edge pair flipped - half the time - one move differs. 5x5 has no PLL-parity												
Rw	U2 x	Rw	U2	3Rw	U2	Lw	U2	Rw'	U2	Rw'	U2	Rw'

run the last layer, before OLL and PLL – both parity algorithms work

NOTATION

Each letter turns that face clockwise,
seen from outside the cube – so from your seat at D and B look counter-clockwise.
counter-clockwise = 2 = half turn.
M = middle slice, turning the w/L turns. x y z = the whole cube, turning the way R, U and F turn. Lowercase f f' = that face plus the layer behind it, turning together.

WORDS

algorithm = a fixed sequence of turns - trigger = a short algorithm you hands run as one unit - sexy move = the R U R' U' trigger - wordmarker = the R F R' F' trigger; parity = a case a 3x3 contains two edge pairs + two edges glued into one, on a 4x4 or 5x5

RURU sexy move. **RURU** Sexu. **R'F'R'F'** dolohammer. sex = change eye.

ANNEX – BIG CUBES AND THE MAP

BIG CUBES 4x4 and 5x5

Reduce: build the 6 centers – put the 12 edges –> solve it as a 3x3. Rw = 2 layers wide. 3Rw = 3 layers. 2R = 2nd LAYER only – never widen it.

last 2 edges

4x4 PLL parity

4x4 OLL parity – 1 edge pair flipped – half the time

Rw U2 x Rw U2 Rw U2 Rw U2 Rw U2 Lw U2 Rw U2 Rw U2 Rw U2 Rw U2
 4x3 edge parity – 1 edge pair flipped – half the time one move differs. 5x5 has an PLL parity

Rw U2 x Rw U2 Rw U2 3Rw U2 Lw U2
 The parity differs in the last layer, before OLL and PLL – but parity algorithms move corners.

NOTATION

Each letter turns that face clockwise, so – so from your seat L and D and B look counter-clockwise –> counter-clockwise.

M = middle slice turning the way L turns. x, y, z = x = the whole cube, turning the way R, U and F turn. Lowercase f = that face plus the layer behind it, turning together.

BEGINNER SHORTCUT

use it until you know Sune

Twist a yellow corner four turns at a time, turning only the top face between corners.

yellow faces RIGHT **R'D'R'D** **x2**

yellow faces FRONT **D'R'D'R** **x2**

WORDS

algorithm = a fixed sequence of turns - trigger = a short algorithm (your hands run as one unit - solve) move = the R or U trigger -> clockwise = clockwise -> counter-clockwise = edge pair = a case a 3x3 cannot have - edge pair = 2 edges glued into one, on a 4x4 or 5x5

■ **RURU** = **RURU** = **RURU** = **RRFF** ■ **slicechanger** ■ **gap** - change grip
