

Print at 100% / Actual size, SINGLE-sided. Crease along the grey line, fold so both printed faces are outward, glue, then cut. This bar must measure exactly 80 mm.

 Learn this card is the memory jog.

R U L F L B = turn the face clockwise, looking at it from outside the cube.
r = counter-clockwise. **2** = half turn. Lowercase **r** = that face plus the layer behind it, turning together.
y = spin the whole cube left, while staying down. A whole-cube turn solves nothing.

WORDS
 algorithm = a fixed sequence of turns - trigger = a short algorithm your hands run as one unit

1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's side color must match the center it touches. No algorithm – work it out.

Can't see it? Build the four white edges on the YELLOW face – first, each about its matching center, then turn each one down 180 degrees.

2 WHITE CORNERS

Find a white corner on top, turn U until it sits above the empty slot it belongs in, then match a picture below and repeat until it drops in.

white sticker RIGHT
R' U' R

white sticker FRONT
L' U' L

white sticker UP run the first one once to knock it out, then look again
R' U' R

3 MIDDLE EDGES

Top edge with NO yellow: turn U until its front color matches the center inside it. The arrow shows which slot it goes to.

goes RIGHT
U R' U' R' y L' U' L

goes LEFT
U' L' U' L y' R' U' R

Edge stuck in the wrong slot? Run either one to kick it out, then place it.

FALLBACK
The badge on each row is your fallback: that many Sunes, with a U turn the worst. Top not all yellow and nothing matches? Run Sune and read again.

No yellow edge at all? Run the first one, then read again.
