

Print at 100% / Actual size — do NOT fit to page. Two-sided, flip on the LONG edge. The numeral on both faces is your check: cut ONE card first. This bar must measure exactly 80 mm: 

FIRST SOLVE
New here? Do the walkthrough once at [cubepath-six.vercel.app/learn](#). This card is the memory jog.
NOTATION
R U F L D B = turn that face clockwise, looking at it from outside the cube.
= counter-clockwise, 2 = half turn. Lowercase r f = that face plus the layer behind it, turning together.
y = spin the whole cube left, white staying down. A whole-cube turn solves nothing.
WORDS
algorithm = a fixed sequence of turns · trigger = a short algorithm your hands run as one unit
1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's side color must match the center it touches. No algorithm — work it out.
Can't see it? Build the four white edges on the YELLOW face first, each above its matching center, then turn each one down 180 degrees.

2 WHITE CORNERS
Find a white corner on top, turn U until it sits above the empty slot it belongs in, then match a picture below and repeat until it drops in.
**white sticker RIGHT**
RUR'U'
**white sticker FRONT**
L'ULU
**white sticker UP** run the first one once to knock it out, then look again
RUR'U'
3 MIDDLE EDGES
Top edge with NO yellow: turn U until its front color matches the center under it. The arrow shows which slot it goes to.
**goes RIGHT**
U RUR'U' y L'ULU
**goes LEFT**
U' L'ULU y' RUR'U'
Edge stuck in the wrong slot? Run either one to kick it out, then place it.

 **RUR'U'** sexy move

 **RUR'U** Sune

 **R'FRF'** sledgehammer

 gap = change grip

ANNEX — BIG CUBES AND THE MAP
BIG CUBES · 4x4 and 5x5
Reduce: build the 6 centers → pair the 12 edges → solve it as a 3x3. Rw = 2 layers wide. 3Rw = 3 layers. 2R = 2nd LAYER ONLY — never widen it.
last 2 edges
4x4 PLL parity
Rw' U' R' U' R' F R F' Rw slice out, run it, slice back — both cubes
2R2 U2 2R2 Uw2 2R2 Uw2 2 edge pairs swapped · half the time
4x4 OLL parity · 1 edge pair flipped · half the time
Rw U2 x Rw U2 Rw U2 Rw' U2 Lw U2 Rw' U2 Rw U2 Rw' U2 Rw' slice one flipped · half the time · one move differs; 5x5 has no PLL parity
Rw U2 x Rw U2 Rw U2 3Rw' U2 Lw U2 Rw' U2 Rw U2 Rw' U2 Rw' slice one flipped · half the time · one move differs; 5x5 has no PLL parity
Fix parity during the last layer, before OLL and PLL — both parity algorithms move corners.
NOTATION
Each letter turns that face clockwise, seen from outside the cube — so from your seat L, D and B look counter-clockwise. = counter-clockwise, 2 = half turn.
M = middle slice, turning the way L turns. x y z = the whole cube, turning the way R, U and F turn. Lowercase r f = that face plus the layer behind it, turning together.
