

FIRST SOLVE

New here? Do the walkthrough once at cubepath-six.vercel.app/note. This card is the memory jog.

R U F D B = turn that face clockwise, looking at from outside the cube.
 = counter-clockwise = 2 half turn. Lowercase **r f** = that face plus the layer behind it, turning together.
y = spin the whole cube left, white staying down. A whole-cube turn solves nothing.

WORDS
 algorithm = a fixed sequence of turns = trigger = a short algorithm you hands run as one unit

1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's side color must match the center it touches. No algorithm – work it out.
 Can't see it? Build the four white edges on the YELLOW face first, each above its matching center, then turn each one down 180 degrees.

2 WHITE CORNERS

Find a white corner on top turn U until it sits above the empty slot it belongs in, then match a picture below and repeat until it drops in.

white sticker RIGHT
RURU'

white sticker FRONT
L'LU

white sticker UP run the first one once to knock it out, then look again
RURU'

3 MIDDLE EDGES

Top edge with NO yellow: turn U until its front color matches the center edge in the U. The arrow shows which slot it goes to.

goes RIGHT
U RURU' y L'LU

goes LEFT
U' L'LU y' RURU'

Edge stuck in the wrong slot? Run either one to kick it out, then place it.

■ **RURU'** ax's move
 ■ **RURU'** Sune
 ■ **RF'RF'** sledgehammer
 gap = change grip

ONE-LOOK PLI

ADJACENT CORNER SWAP

exactly one face shows headlight

TWO-LOOK	OLL CORNERS continued
OLL CROSS yellow edges	
 Line bar left-to-right F R U R' U' f'	 Headlights 2 2 yellow; headlights at the back R2D'R'U2 R D'R'U2R'
 Hook hook pointing front-right f R U R' U' f'	 2x Headlights 2 0 yellow; headlights both sides RUR'U RU'R' URU2R'
OLL CORNERS yellow face	
 Sune 3 1 yellow; rest clockwise RU'R'U RU2R'	 Chameleon 3 2 yellow next to each other f R U R' U' f' FR'
 Anti-Sune 3 1 yellow; rest counter-clockwise RU2R' U'R'UR'	 Bowtie 3 2 yellow diagonal f' R U R' U' f' FR
 Pi 3 0 yellow; headlights left f R U R' U' f' FRU'R'U' f'	FALLBACK The badge on each row is your fallback: for many Sunes, with a U turn between, also finishes the case. Machine-checked; three is the worst. Top not all yellow and nothing matches? Run Sune and read again.

ANNEX – BIG CUBES AND THE MAP

BIG CUBES 4x4 and 5x5
 Reducing the big centers → pair the 12 edges to solve it as a 3x3. Rw = 2 layers wide, 3Rw = 3 layers. 2R = 2nd LAYER ONLY – never under it.
 last 2 edges

	Rw	U'	R'	U	R	F	R'	Rw	
4x4 PLL parity	x	U'2	x	U'2	R'2	Uw2	R'2	Uw2	

1 edge swapped - half PLL parity

Rw	U'2	x	U'2	R'	Uw2	R'2	Uw2	
5x5 U2 parity	x	U'2	R'	Uw2	R'2	Uw2		

1 edge pair flipped - half the time · one move differs; 5x5 has no PLL parity

Rw	U'2	x	U'2	R'w	U'2	R'w	U'2	R'w
Rw	U'2	x	U'2	R'w	U'2	R'w	U'2	R'w

Fix the last layer, before OLL and PLL – both parity algorithms move corners.

NOTATION

Each letter turns that face clockwise, seen from outside the cube – so from your seat! L and B look counter-clockwise, = counter-clockwise. 2 = half turn.

M = middle slice, turning the way L turns. x y z = the whole cube, turning the way R, U and F turn. Lowercase f = that face plus the layer behind it, turning together.

BEGINNER SHORTCUT

use it until you know Sune

Twist a yellow corner four times at a time, turning ONLY the top face between corners.

yellow faces RIGHT **R'D'R** x2

yellow faces FRONT **D'R'DR** x2

WORDS

algorithm = a fixed sequence of turns · trigger = a short algorithm you hands run as one unit · sexy move = the R' U R' U' trigger · sledgehammer = the R F B trigger · parity = a case a 3x3 cannot handle, two edges glued into one, on a 4x4 or 5x5
