

Print at 100% / Actual size, SINGLE-sided. Crease along the grey line, fold so both printed faces are outward, glue, then cut. This bar must measure exactly 80 mm:

50 mm

Not a tier, no unlock, no order. Use it when you buy a 4x4.

Every ALGORITHM on these cards is expanded from machine-verified data and checked against a cube simulator at build time. If one were wrong the build would fail rather than ship. Recognition working is generated from the same permutation the diagram is drawn from. Set V1.0 - reprint any single card at cheaply-six-cent-per-page print - print at 100% / Actual size, never fit to page.

PRINT AND VERSION

where the medium stops

the app, with a real cube and randomised setup. This set stops

with no thing came but full OLL is 57 cases, 22 of which differ only

but a full you don't. PLL cross planning and look-ahead are still

A card is good at a closed set of cases you tell apart by sight. It is

adjacent corner swap = the wrapping corners share an edge.

diagonal corner swap = the wrapping corners sit opposite

After their full OLL, PLL, cross planning, look-ahead - in the app,

3/5 ONE-LOOK PLL +15 - done: all 21 named, twice on separate

2/3 TWO-LOOK +13 - unlock: fifteen last layers in exactly two

down.

1/3 FIRST SOLVE - 9 algorithms - unlock: five solves, card face

THE LADDER

ANNEX - BIG CUBES AND THE MAP

WORDS

ANNEX - BIG CUBES AND THE MAP

BIG CUBES - 4x4 and 5x5

Reduce: build the 6 centers → pair the 12 edges → solve it as a 3x3. Rw = 2 layers wide. 3Rw = 3 layers. 2R = 2nd LAYER ONLY - never widen it.

last 2 edges

4x4 PLL parity

4x4 OLL parity - 1 edge pair flipped - half the time

Rw U2 x Rw U2 Rw U2 Rw' U2 Lw U2 Rw' U2 Rw U2 Rw' U2 Rw' U2

3x5 edge parity - 1 edge pair flipped - half the time. one case different, 5x5 has no PLL parity

Rw U2 x Rw U2 Rw U2 3Rw' U2 Lw U2 Rw' U2 Rw U2 Rw' U2 Rw' U2

Fix parity during the last layer, before OLL and PLL - both parity algorithms move corners.

NOTATION

Each letter turns that face clockwise, seen from outside the cube - so from your seat L, D and B look counter-clockwise. ' = counter-clockwise. 2 = half turn.

M = middle slice, turning the way L turns. x y z = the whole cube, turning the way R, U and F turn. Lowercase f = that face plus the layer behind it, turning together.

WORDS

algorithm = a fixed sequence of turns - trigger = a short algorithm your hands run as one unit - sexy move = the R U R' U' trigger - sledgehammer = the R F R F' trigger - parity = a case a 3x3 cannot have - edge pair = two edges glued into one, on a 4x4 or 5x5

RUR'U' sexy move RUR'U' Sune R'FRF' sledgehammer gap = change grip
