ANNEX – BIG CUBES AND THE MAP THE LADDER 1/3 FIRST SOLVE - 9 algorithms - unlock: five solves, card face down. 2/3 TWO-LOOK - +13 - unlock: fifteen last layers in exactly two algorithms. 3/3 ONE-LOOK PLL - +15 - done: all 21 named, twice on separate days. After that: full OLL, F2L, cross planning, look-ahead – in the app. WHY THERE ARE ONLY THREE A card is good at a closed set of cases you tell apart by sight. It is bad at a skill you drill. F2L, cross planning and look-ahead are drills with no finite case list. Full OLL is 57 cases, 22 of which differ only in a sliver a fifth of a millimetre wide at this size. All of them are in the app, with a real cube and randomised setup. This set stops where the medium stops. PRINT AND VERSION Every ALGORITHM on these cards is expanded from machine-verified data and checked against a cube simulator at build time; if one were wrong the build would fail rather than ship. Recognition wording is generated from the same permutation diagram is drawn from. Set v1.0 - reprint any single card at cubeshift-six-vercel-app/print - print at 100% / Actual size, never fit to page. Not a tier, no unlock, no order. Use it when you buy a 4x4.  20 mm	ANNEX – BIG CUBES AND THE MAP THE LADDER 1/3 FIRST SOLVE - 9 algorithms - unlock: five solves, card face down. 2/3 TWO-LOOK - +13 - unlock: fifteen last layers in exactly two algorithms. 3/3 ONE-LOOK PLL - +15 - done: all 21 named, twice on separate days.
