

Print at 100% / Actual size, SINGLE-sided. Crease along the grey line, fold so both printed faces are outward, glue, then cut.

[illegible]

ANNEX – BIG CUBES AND THE MAP

BIG CUBES – 4x4 and 5x5

Reduce, place the 6 centers – pair the 12 edges – solve it as a 3x3. Rw = 2 layers wide. 3Rw = 3 layers. 2R = 2nd Layer ONLY – never wrap it.

Last 2 edges

4x4 PLL parity

4x4 OLL parity = 1 edge pair flipped - half the time

Rw U2 x Rw U2 R'w U2 Rw U2 R'w U2 Lw U2 U2 Rw U2 Rw U2 Rw' U2 Rw' U2

5x5 edge parity = 1 edge pair flipped - half the time one twice differs, 5x5 has no PLL parity

Rw U2 x Rw U2 R'w U2 Rw U2 R'w U2 Lw U2 U2 Rw U2 Rw U2 Rw' U2 Rw' U2

Full parity, different 12 edge lay outs for OLL and PLL - both parity algorithms are more complex

NOTATION

R U F L B = turn that face clockwise, from outside the cube. = "counter-clockwise" = 2 = half turn

M = middle slice, turning the way I turn. x turns x = the whole cube, turning the way R turns. Lw = 180 degree Lw = twice that plus the layer behind it, turning together.

WORDS

algorithm = a fixed sequence of turns - trigger = a short algorithm your hands runs as one unit - solve move the cube - solve the U trigger - solve the R trigger - solve the F trigger - parity = a case a 3x3 cannot have edge pair = two edges glued into one, on a 4x4 or 5x5

ANNEX – BIG CUBES AND THE MAP

BIG CUBES: 4x4 and 5x5
Reduce: build the 6 centers → pair the 12 edges → solve it as a 3x3. Rw = 2 layers wide, rRw = 3 layers. 2R = 2nd Layer ONLY – never wrap!
last 2 edges
4x4 PLL parity R' U' U' R' F' R' F' R' slice out, turn s, slice back – both cubes
2R2 U' 2R2 Uw2 2R2 Uw2 2 edge pairs swapped - half the time
4x4 OLL parity = 1 edge pair flipped - half the time
5x5 U2 x Rw U2 Rw U2 Rw' U2 Lw U2 Rw' U2 Rw U2 Rw' U2 Rw'
5x5 edge parity = 1 edge pair flipped - half the time - one move differs: 5x5 has no PLL parity
5x5 U2 x Rw U2 Rw' U2 Rw' U2 Rw' U2 Rw' U2 Rw' U2 Rw' U2 Rw'
Fix some of the last layer, before OLL and PLL – both parity algorithms will move them.

NOTATION
R O F L D B = turn that face clockwise, from outside the cube.
r = clockwise, 2 = half turn
M = middle slice, turning the way L turns; x y z = the whole cube,
turning the way x turns. Y Z lowercase = Z that face plus the
layer behind it, turning together.

WORDS
algorithm = a fixed sequence of turns + trigger = a short algorithm you hands run on unit - sexy move, on a R U F U' trigger.
the key word = the R F R' trigger. parity = a case a 3x3 cannot have - edge pair = two edges glued into one, on a R U F U' trigger.
