

1 WHITE CROSS

New here? Do the walkthrough once at [cubepath-six.vercel.app/learn](#). This card is the memory jog.

NOTATION

R = turn that face clockwise, looking at it from outside the cube.
r = counter-clockwise, 2 = half turn. Lowercase **r** = that face plus the layer behind it, turning together.
y = spin the whole cube left, white staying down. A whole-cube turn solves nothing.

WORDS

algorithm = a fixed sequence of turns + trigger = a short algorithm your hands can't do as one unit

1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's side color must match the center it touches. No algorithm – use your eyes. Can't see it? Build the four white edges on the 'YELLOW' face first, each above its matching center, then turn each one down 180 degrees.

2 WHITE CORNERS

Find a white corner on top, turn U until it sits above the spot it drops into, then match a picture below and repeat until all 3 drops in.

white sticker RIGHT
RUR'

white sticker FRONT
L'ULU

white sticker UP turn the first one once to knock it out, then look again
RUR'

3 MIDDLE EDGES

Top edge with NO yellow: turn U until its front color matches the center under it. The arrow shows which edge it goes to.

goes **RIGHT**
U' R'UL' y L'ULU

goes **LEFT**
U' L'ULU y' R'UL'

Edge stuck in the wrong slot? Run either one to kick it out, then place it.
