Print at 100% / Actual size, SINGLE-sided. Crease along the grey line, fold so both printed faces are outward, glue, then cut. This bar must measure exactly 80 mm:

TWO-LOOK

PLL CORNERS · headlights = two matching corners on one face

T headlights on ONE face — hold that face LEFT

RUR'U' R'F R2U'R'U' RUR'F'

F headlights — the two swapping corners sit diagonally

FRU'R'U' RUR'F' RUR'U' R'FR²F'

Y no headlights — the two swapping corners sit diagonally

FRU'R'U' RUR'F' RUR'U' R'FR²F'

START HERE · two new algorithms finish any last layer

Yellow cross: F R U R' U' F' until the cross appears — at most 3. Yellow face: Sune, read again, repeat — at most 3 (see the badges). Corners: T-Perm. No headlights to hold left? Run it twice. Each case on the front replaces one repeat with one run. Three a week: you can solve the whole time.

Both show headlights on all four faces. The edge between them decides: it belongs to the opposite face = H, to a neighbour = Z.

H VS Z

STUCK? Corners home but nothing solves? Turn the top face once and read again — that is often the whole fix.

One case has beaten you five times? Park it, use its fallback above, come back next week.

A single piece looks twisted and no algorithm touches it? The cube was reassembled wrong. Pop it out and reseat it.

WORDS

OLL = make the whole top face yellow · PLL = slide the top pieces · headlights = two matching corners on one face · ALF = the free top turn that lines a case up

PLL EDGES · corners home, top still not solved

Ua the front edge travels RIGHT

R2U RUR'U' R'U' RUR'

Ub the front edge travels LEFT

R2U RUR'U' R'U' RUR'

M2U M2U M'UM2

H both pairs swap straight across

M2U'M2 U2 M2U'M2

Z each pair swaps with its neighbour

M'U' M2U'M2U' M'U2 M2U

THE NEW ORDER: yellow cross, yellow face, corners home, edges home. This never changes again. Card 1's order is refined, and so is Nilas: it moves corners but weeks the yellow face, and here the yellow face is finished first. UNLOCK CARD 3 — fifteen last layers in a row, each finished in exactly two algorithms, case named out loud first. A repeat does not count. □ MASTER: solves averaging under 1:00. My target: ____ . NEXT: 3/3 ONE-LOOK PLL

30 mm

TWO-LOOK ■■□ 2/3 · A

OLL CROSS · yellow edges

Line bar left-to-right

FRUR'U'F'

Hook hook pointing front-right

fRUR'U'f'

OLL CORNERS · yellow face

Sune 1 yellow, rest clockwise

RUR'U R U2R'

Anti-Sune 2 yellow, rest counter-clockwise

RU2R' U'RU'R'

Pi 2 0 yellow, headlights left

fRUR'U'f' FRUR'U'F'

No yellow edge at all? Run the first one, then read again.

OLL CORNERS · continued

Headlights 3 2 yellow, headlights at the back

R2DR'U2 RD'R'U2R'

2x Headlights 2 0 yellow, headlights both sides

RUR'U RU'R' URU2R'

Chameleon 3 2 yellow next to each other

rUR'U'r' FRF'

Bowtie 3 2 yellow diagonal

F'rUR'U'r' FR

FALLBACK

The badge on each row is your fallback: that many Sunes, with a U turn between, also finishes the case. Machine-checked; three is the worst.

Top not all yellow and nothing matches? Run Sune and read again.

RUR'U' sexy move · **RUR'U** Sune · **R'FRF'** sledgehammer · gap = change grip
