

Print at 100% / Actual size — do NOT fit to page. Two-sided, flip on the LONG edge. The numeral on both faces is your check: cut ONE card first. This bar must measure exactly 80 mm: 

FIRST SOLVE
New here? Do the walkthrough once at [cubepath-six.vercel.app/learn](#). This card is the memory jog.
NOTATION
R U L D B = turn that face clockwise, looking at it from outside the cube.
= counter-clockwise, 2 = half turn. Lowercase r f = that face plus the layer behind it, turning together.
y = spin the whole cube left, white staying down. A whole-cube turn solves nothing.
WORDS
algorithm = a fixed sequence of turns · trigger = a short algorithm your hands run as one unit
1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's side color must match the center it touches. No algorithm — work it out.
Can't see it? Build the four white edges on the YELLOW face first, each above its matching center, then turn each one down 180 degrees.

2 WHITE CORNERS
Find a white corner on top, turn U until it sits above the empty slot it belongs in, then match a picture below and repeat until it drops in.
**white sticker RIGHT**
RUR'U'
**white sticker FRONT**
L'ULU
**white sticker UP** run the first one once to knock it out, then look again
RUR'U'
3 MIDDLE EDGES
Top edge with NO yellow: turn U until its front color matches the center under it. The arrow shows which slot it goes to.
**goes RIGHT**
U RUR'U' y L'ULU
**goes LEFT**
U' L'ULU y' RUR'U'
Edge stuck in the wrong slot? Run either one to kick it out, then place it.

 **RUR'U'** sexy move

ANNEX — BIG CUBES AND THE MAP
BIG CUBES 4x4 and 5x5
Reduce: build the 6 centers → pair the 12 edges → solve it as a 3x3. Rw = 2 layers wide. 3Rw = 3 layers. 2R = 2nd LAYER ONLY — never widen it.
last 2 edges **Rw' U' R' U' R' F R F' Rw** slice out, run it, slice back — both cubes
4x4 PLL parity **2R2 U2 2R2 Uw2 2R2 Uw2** 2 edge pairs swapped - half the time
4x4 OLL parity - 1 edge pair flipped - half the time
Rw U2 x Rw U2 Rw U2 Rw' U2 Lw U2 Rw' U2 Rw U2 Rw' U2 Rw' slice edge parity - 1 edge pair flipped - half the time - one case differs: swap no PLL parity
Rw U2 x Rw U2 Rw U2 3Rw' U2 Lw U2 Rw' U2 Rw U2 Rw' U2 Rw' slice edge parity - 1 edge pair flipped - half the time - one case differs: swap no PLL parity
Fix parity during the last layer, before OLL and PLL — both parity algorithms move corners.
NOTATION

Each letter turns that face clockwise, seen from outside the cube — so from your seat L, D and B look counter-clockwise. = counter-clockwise, 2 = half turn.
M = middle slice, turning the way L turns. x y z = the whole cube, turning the way R, U and F turn. Lowercase r f = that face plus the layer behind it, turning together.
WORDS

ANNEX — BIG CUBES AND THE MAP THE LADDER 1/3 FIRST SOLVE · 9 algorithms · unlock: five solves, card face down. 2/3 TWO-LOOK · +13 · unlock: fifteen last layers in exactly two algorithms. 3/3 ONE-LOOK PLL · +15 · done: all 21 named, twice on separate days. After that: full OLL, F2L, cross planning, look-ahead — in the app, not on card stock. WHY THERE ARE ONLY THREE A card is good at a closed set of cases you tell apart by sight. It is bad at a skill you drill. F2L, cross planning and look-ahead are drills with no finite case list. Full OLL is 57 cases, 22 of which differ only in a slider a fifth of a millimetre wide at this size. All of them are in the app, with a real cube and randomised setup. This set stops where the medium stops. PRINT AND VERSION Every ALGORITHM on these cards is expanded from machine-verified data and checked against a cube simulator at build time; if one were wrong the build would fail rather than slip. Recognition wording is generated from the same permutation diagram is drawn from. Set v1.0, reprint any single card at cubepath-six-vercel.app/print · print at 100% / Actual size, never · Fit to page. Not a tier, no unlock, no order. Use it when you buy a 4x4. 	WORDS OLL = make the whole top face yellow · PLL = slide the top pieces home · Sune = the one-yellow-corner algorithm, used on every card after Card 1 · sexy move = the R U R' U' trigger · sledgelineamer = the R' F R' F' trigger · headlights = two matching corners on one face · trigger = a short algorithm your hands run as one unit · AUF = the free top turn that lines a case up parity = a case a 3x3 cannot have · edge pair = two edges glued into one, on a 4x4 or 5x5 · F2L = first two layers, solved as pairs · look-ahead = watching the next piece while your hands finish this one · adjacent corner swap = the swapping corners share an edge · diagonal corner swap = the swapping corners sit opposite LAST-LAYER ORDER ON THIS CARD: yellow cross, match edges, place corners, twist corners. Card 2 replaces this order permanently — it is the only thing on this card that gets retired. UNLOCK CARD 2 — five scrambles in a row with this card face down. ◻ MASTER: PLL under 3 s, solves under 0:30. My target: _____. -NEXT: 2/3 TWO-LOOK 	ANNEX — BIG CUBES AND THE MAP THE LADDER 1/3 FIRST SOLVE · 9 algorithms · unlock: five solves, card face down. 2/3 TWO-LOOK · +13 · unlock: fifteen last layers in exactly two algorithms. 3/3 ONE-LOOK PLL · +15 · done: all 21 named, twice on separate days. After that: full OLL, F2L, cross planning, look-ahead — in the app, not on card stock. WHY THERE ARE ONLY THREE A card is good at a closed set of cases you tell apart by sight. It is bad at a skill you drill. F2L, cross planning and look-ahead are drills with no finite case list. Full OLL is 57 cases, 22 of which differ only in a slider a fifth of a millimetre wide at this size. All of them are in the app, with a real cube and randomised setup. This set stops where the medium stops. PRINT AND VERSION Every ALGORITHM on these cards is expanded from machine-verified data and checked against a cube simulator at build time; if one were wrong the build would fail rather than slip. Recognition wording is generated from the same permutation diagram is drawn from. Set v1.0, reprint any single card at cubepath-six-vercel.app/print · print at 100% / Actual size, never · Fit to page. Not a tier, no unlock, no order. Use it when you buy a 4x4.
