FALLBACK

The badge on each row is your fallback; that many Sunes, with a U turn, most often, also finishes the case. Machine-checked; three is the worst. Top not all yellow and nothing matches? Run Sun and read again.

On yellow edge at all? Run the first one, then read again.

ANNEX – BIG CUBES AND THE MAP ©2020 A. J. A.

BIG CUBES 4x4 and 5x5
 Reduce, build the 6 centers → pair the 12 edges → solve it as a 3x3. Rw = 2 layers wide. 3Rw = 3 layers. 2R = 2nd LAYER only – never violate it.

last 2 edges
 4x4 PLL parity
$$\begin{matrix} R'w' & U' & R' & U & R' & F & R' & F & R' & U' \\ 2R2 & U2 & 2R2 & U2 & 2R2 & U2 & 2R2 & U2 & 2R2 & U2 \end{matrix}$$
 slice out, run it, slice back – both cubes
 2 edge pairs swapped - half the time

4x4 OLL parity = 1 edge pair flipped - half the time

$$\begin{matrix} R & W & U2 & x & R & W & U2 & R'w' & U2 & U2 \\ R'w' & U2 & x & R'w' & U2 & R'w' & U2 & R'w' & U2 & R'w' \end{matrix}$$
 5x5 edge parity – one edge is flipped. 5x5 can't do PLL parity

$$\begin{matrix} R & W & U2 & x & R & W & U2 & R'w' & U2 & R'w' \\ R'w' & U2 & x & R'w' & U2 & R'w' & U2 & R'w' & U2 & R'w' \end{matrix}$$
 slice out, run it, slice back – both cubes
 2 edge pairs swapped - half the time

Fix parity during the last layer, before OLL and PLL – both parity algorithms work.

NOTATION
 U = up, D = down, L = left, R = right
 Let each letter turn that clockw/ise, seen from outside the cube – so from your point of view. L, D and B look counter-clockw/ise. = counter-clockw/ise. z = half turn.
 M = middle slice, turning the way L turns x y z = the whole cube, turning the way R, U, L turn. Lowercase f = that face plus the layer behind it, turning together.

WORDS
 algorithm = a fixed sequence of turns - trigger = a short algorithm your hands run as one unit - sexy move = the R U R' U' trigger - slider - sliderchange = the R' F R F' trigger - parity = a 3x3 can't have a change pair = two edges glued into one, on a 4x4 or 5x5
