1 F2 (Front face 180 degrees)

FIRST SOLVE

New here? Do the walk through once at cubepath3.svn.vercel.app/. This card is the memory jog.

NOTATION

R U F L B = turn that face clockwise, looking at from outside the cube.

r = counter-clockwise, **2** = half turn. Lowercase **r f** = that face plus the layer behind it, turning together.

y = spin the whole cube left, while staying down. A whole-cube turn solves nothing.

WORDS

algorithm = a fixed sequence of turns - trigger = a short algorithm you hands run as one unit

1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's side color must match the center it touches. No algorithm – work it out.

Can't see it? Build the four white edges on the YELLOW face first, each above its matching center, then turn each one down 180 degrees.

2 WHITE CORNERS

Find a white corner on top. Turn U until it sits above the empty slot it belongs in, then match a picture below and repeat until it drops in.

white sticker RIGHT
R' U' R

white sticker FRONT
L' U' L

white sticker UP run the first one once to knock it out, then look again
R' U' R

3 MIDDLE EDGES

Top edge with NO yellow: turn U until its front color matches the center inside it. The arrow shows which slot it goes to.

goes RIGHT
U R' U' y' L' U' L

goes LEFT
U L' U' L U' y' R' U' R

Edge stuck in the wrong slot? Run either one to kick it out, then place it.
