

Print at 100% / Actual size, SINGLE-sided. Crease along the grey line, fold so both printed faces are outward, glue, then cut. This bar must measure exactly 80 mm.

The diagram illustrates the sequence of moves for solving the yellow corners of a Rubik's Cube, organized into four rows and four columns. Each cell contains a cube diagram, a label, and a brief description of the state.

Row 1:

- 6 PUT THE YELLOW CORNERS HOME**: The cube is in a state where the yellow corners are being placed. The label indicates that the corners are being placed in their correct positions.
- 5 MATCH THE YELLOW EDGES**: The cube is in a state where the yellow edges are being matched. The label indicates that the edges are being matched to the yellow corners.
- 4 FOCUS ON YELLOW EDGES ONLY**: The cube is in a state where the yellow edges are being focused on. The label indicates that the edges are being focused on.
- 3 MATCH THE YELLOW EDGES**: The cube is in a state where the yellow edges are being matched. The label indicates that the edges are being matched to the yellow corners.

Row 2:

- 2 TWIST THE YELLOW CORNERS**: The cube is in a state where the yellow corners are being twisted. The label indicates that the corners are being twisted.
- 1 ROLL THE YELLOW CORNERS**: The cube is in a state where the yellow corners are being rolled. The label indicates that the corners are being rolled.
- 0 ROLL THE YELLOW CORNERS**: The cube is in a state where the yellow corners are being rolled. The label indicates that the corners are being rolled.
- 0 ROLL THE YELLOW CORNERS**: The cube is in a state where the yellow corners are being rolled. The label indicates that the corners are being rolled.

Row 3:

- 0 ROLL THE YELLOW CORNERS**: The cube is in a state where the yellow corners are being rolled. The label indicates that the corners are being rolled.
- 0 ROLL THE YELLOW CORNERS**: The cube is in a state where the yellow corners are being rolled. The label indicates that the corners are being rolled.
- 0 ROLL THE YELLOW CORNERS**: The cube is in a state where the yellow corners are being rolled. The label indicates that the corners are being rolled.
- 0 ROLL THE YELLOW CORNERS**: The cube is in a state where the yellow corners are being rolled. The label indicates that the corners are being rolled.

Row 4:

- 0 ROLL THE YELLOW CORNERS**: The cube is in a state where the yellow corners are being rolled. The label indicates that the corners are being rolled.
- 0 ROLL THE YELLOW CORNERS**: The cube is in a state where the yellow corners are being rolled. The label indicates that the corners are being rolled.
- 0 ROLL THE YELLOW CORNERS**: The cube is in a state where the yellow corners are being rolled. The label indicates that the corners are being rolled.
- 0 ROLL THE YELLOW CORNERS**: The cube is in a state where the yellow corners are being rolled. The label indicates that the corners are being rolled.

FIRST SOLVE

New here? Do the walk through once at cubepath3.vscerol.app/. This card is the memory jog.

NOTATION

R U F L B = turn that face clockwise, looking at from outside the cube.

r = counter-clockwise, **2** = half turn. Lowercase **r f** = that face plus the layer behind it, turning together.

y = spin the whole cube left, white staying down. A whole-cube turn solves nothing.

WORDS

algorithm = a fixed sequence of turns - trigger = a short algorithm you hands run on one unit

1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's side color must match the center it touches. No algorithm – work it out.

Can't see it? Build the four white edges on the YELLOW face first, each above its matching center, then turn each one down 180 degrees.

2 WHITE CORNERS

Find a white corner on top. Turn U until it sits above the empty slot it belongs in, then match a picture below and repeat until it drops in.

white sticker RIGHT
R'U'R

white sticker FRONT
L'U'L

white sticker UP run the first one once to knock it out, then look again
R'U'R

3 MIDDLE EDGES

Top edge with NO yellow: turn U until its front color matches the center inside it. The arrow shows which slot it goes to.

goes RIGHT
U R'UR' y L'U'L

goes LEFT
U L'U'L U' y' R'UR'

Edge stuck in the wrong slot? Run either one to kick it out, then place it.

R U F L B sexy move
 R U F L B Sune
 R' U' F' L' B' slicehammer
 y = change grip

1 **IGNORE THE CORNERS** yellow edges only – ignore the corners
 not to yellow edges at all

2 **HOOK TWO AT A RIGHT ANGLE** hold them back and LEFT

3 **LINE HOLD** line left-to-right

4 **5 AGAIN THE YELLOW CORNERS**
 First two at a right angle, hold them back and left
 This algorithm is called **hook**, you use it on every corner after this

5 **REPEAT STEP 4**
 First two at a right angle, hold them back and left
 This algorithm is called **hook**, you use it on every corner after this

6 **PUT THE YELLOW CORNERS HOME**
 one corner home hold in FRONT-LEFT
 one corner home turn it once from any hold, then look

7 **TWIST THE YELLOW CORNERS**
 yellow faces RIGHT
 yellow faces RIGHT

New here? Do the walk-through once at cubepath3.5.vercel.app/. This card is the memory jog.

NOTATION
R U F L B = turn a face clockwise, looking at from outside the cube.
r = counter-clockwise, **2** = half turn. Lowercase **r** = that face plus the layer behind it, turning together.
y = spin the whole cube left, white staying down. A whole-cube turn solves nothing.

WORDS
algorithm = a fixed sequence of turns • trigger = a short algorithm you're hands run as one unit

1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's color side must match the center it touches. No algorithm – work it out. Can't see it? Build the four white edges on the YELLOW face first, each achieve its matching center, then turn each one down 180 degrees.

2 WHITE CORNERS

Find a white corner on top. Turn **U** until it sits above the empty slot it belongs in, then match a picture below and repeat until it drops in.

white sticker RIGHT
RUR'U'

white sticker FRONT
L'ULU

white sticker UP run the first one once to knock it out, then look again
RUR'U'

3 MIDDLE EDGES

Top edge with NO yellow: turn **U** until its front color matches the center inside it! The arrow shows which slot it goes to.

goes RIGHT
U RUR'U' y L'ULU

goes LEFT
U L'ULU y' RUR'U'

Edge stuck in the wrong slot? Run either one to kick it out, then place it.

- 4 YELLOW CROSS** yellow edges only – ignore the corners

 - Don't worry edges at all
 - Hook two at a right angle; hold them BACK and LEFT
 - Turn half the left-to-right
- FAURVU**

 - Time holds the left-to-right
- 5 MATCH THE YELLOW EDGES**
 First turn (so at least two edge matches the center square). Then algorithm is called: you use it on every card after that.

 - Two matched, side by side hold them BACK and LEFT
- RURV RUZR**

 - Two matched, opposite turn it once from any hold then
- 6 PUT THE YELLOW CORNERS HOME**

 - One corner home hold it in FRONT-LEFT
- RULV RUVL**

 - This picks the other three corners too – repeated, the next spot reveals it.
- 7 TWIST THE YELLOW CORNERS**

 - Yellow faces RIGHT
- RDBR x2**

 - Yellow faces FRONT
- DPRR x2**

 - Brown corners ONLY the top face is being the next last top turning it right. Move turn that the whole cube will have destroyed while you do that keep going –
- AST-1-WEED ORICE ON THIS CABD)
 place corners, match edges, place corners, twist corners. Card C replaces that corner primarily – it is the only thing on this card that gets ignored.
 UNICOR C-ABT – five examples – a few with this card face down, o MATICES: those have limit 300, they target: ——— NEXT: 2/3 TWO-TWO LOOK
