

FIRST SOLVE

New! Here's the walkthrough once at cubeputh-six-vercel/app/learn. This card is the memory jog!

NOTATION

R = turn right 90° clockwise
L = turn left 90° counter-clockwise
2 = half turn
Lowercase r = that face push the layer behind it, turning together
y = spin the whole cube left, white staying down. A whole-cube turn solves nothing.

WORDS

algorithm = a fixed sequence of turns - triggering = a short algorithm your hands run as one unit

1 WHITE CROSS

White center DOWN. Bring the four white edges to it. Each edge's side color must match the center it touches. No corners – turn it out.

Can't see it? Build the four white edges on the **YELLOW** face first, each above its matching center, then turn each one down 180 degrees.

2 WHITE CORNERS

white sticker RIGHT
RUR'U'

white sticker FRONT
L'ULU

white sticker UP Run the first one once to knock it out, then look again
RUR'U'

3 MIDDLE EDGES

Top edge with NO yellow: turn U until its front color matches the center under it. The arrow shows what slot it goes to

goes RIGHT
U' RUR'U' y L'ULU

goes LEFT
U' L'ULU L' y RUR'U'

Edge stuck in the wrong slot? Run either one to kick it out, then place it.
