ANNEX – BIG CUBES AND THE MAP

BIG CUBES: 4x4 and 5x5

Reduce: build the 6 centers → pair the 12 edges → solve it as a 3x3. Rw = 2 layers wide. 3Rw = 3 layers. 2R = 2nd LAYER ONLY – never widen it.

last 2 edges

4x4 PLL parity

R U R'	F R' F'	R U R'	Uw2	Uw2	slice out, run it, slice back – both cubes
2R2	U2	2R2	Uw2	Uw2	2 edge pairs swapped · half the time

4x4 OLL parity – 1 edge pair flipped - half the time

Rw U2 x Rw	U2 Rw U2	Uw2	Lw U2 Rw' U2	Rw U2 Rw' U2 Rw' U2 Rw' U2	one more difference 3x3 has 1/2 PLL parity
Rw U2 x Rw	U2 Rw U2	3Rw' U2	Lw U2 Rw' U2	Rw U2 Rw' U2 Rw' U2 Rw' U2	

Fix parity during the last layer, before OLL and PLL – both parity algorithm move corners.

NOTATION

Each letter turns that face clockwise, seen from outside the cube – so from your seat L, D and B look counter-clockwise. = counter-clockwise. 2 = middle slice, turning the way L turns. x y z = the whole cube, turning the way R, U and F turn. Lowercase f = that face plus the layer behind it, turning together.

BEGINNER SHORTCUT use it until you know Suno

Twist a yellow corner four turns at a time, turning ONLY the top faces between corners.
